Regarding : Summer Internship for Python and Django

I'm writing this cover to express my interest for summer internship as a requirement of python and django developer. I learned about this internship from a mail sent by a faculty of our college. I am interested in this internship and I think I am a good choice for it as I am good in python with 3S in Codechef and also a handson with Django. I have built couple of project with Django framework in backend.

In python I have qualified with 5S in hackerrank with having a good position of 3S in codechef. I have also received certificates in various competitive programming. In Django I have completed many projects working as a full stack developer where I have used various types of database and also mail functioning in it which have mould my project in its best form. I have mentioned my all project work in my resume with github link provided in it.

I am certain that my couple year of experience and skills set would make me a great candidate for this position as wellas great asset to this internship. Please give me a feedback at the mail mentioned above for further updates. I appreciate your consideration and look forward to hearing from you.

Sincerely,

Sumit Mahajan
